Plugins & Interfaces

WHMCS Registrar Module

WHMCS Registrar Module

[WHMCS](#) is a popular web hosting and automation solution, which includes billing and support

options.

If you are using WHMCS for your hosting activities, you may interface Joker.com with WHMCS' domain functionality to easily order and manage domains from within WHMCS.

Joker.com maintains a registrar module for WHMCS, which offers a great load of features to interface Joker.com seamlessly from within WHMCS:

The following registrar core functionality is provided:

- register domains
- initiate transfers
- perform renewals

A screenshot of the WHMCS Registrar Module interface. The page title is "Managing gnrz24.com". The breadcrumb trail is "Portal Home / Client Area / My Domains / gnrz24.com". The main content area is titled "Addons" and lists three available add-ons: "ID Protection" (Buy Now for \$0.00 USD), "DNS Host Record Management" (Manage, Disable), and "Email Forwarding" (Manage, Disable). The left sidebar contains a "Manage" section with links for Overview, Auto Renew, Nameservers, Registrar Lock, Addons, Contact Information, Private Nameservers, DNS Management, Email Forwarding, and EPP Code. Below this is an "Actions" section with links for Renew, Register a New Domain, and Transfer in a Domain. The top navigation bar includes Home, Services, Domains, Billing, Support, and Open Ticket. The top right corner shows "View Cart (1)", "Notifications (0)", "Choose language", and a message: "You are currently masquerading as a client. Logout & return to Admin Area". The user is identified as "Hello, Jan!".

Powered by [WHMCompleteSolution](#)

Plugins & Interfaces

- allow viewing and changing of nameservers
- allow viewing and changing of WHOIS information of domains
- usable with any TLD Joker.com offers
- TLD & Pricing Sync

Additionally, also these features are provided:

- create/edit email forwards
- create/edit dns records for joker-ns
- fetch auth id ("EPP Code")
- sync of expiration date
- order whois privacy protection with domain registration, transfer and renewal
- switch easily between production and testing environment (OT&E)

Installation:

Please extract the contents of the **below attached ZIP archive** into the folder

modules/registrars/joker/

of your **WHMCS** installation.

The configuration of the Joker.com registrar module is done by using the **WHMCS admin section**. For this, please login as "admin" into your WHMCS installation, and navigate to

Setup -> Products/Services -> Domain Registrars

Pick "Joker.com" from the list, "Activate" the plugin, and enter your Joker.com Reseller's credentials - **the same you are using for DMAPI**.

Alternatively, you also may use Joker.com [API keys](#).

You also may choose to use the "TestMode" for dry run on our OT&E platform, or to configure the free Joker.com nameservers as a default for new domains.

Once activated, you may always change these settings by clicking on "Configure". Don't forget to "Save Changes" after doing so.

Plugins & Interfaces

Usage:

You will find most options for domains in section "**Clients -> Domain registrations**" - **click on the domain name** to see all domain details.

A special command there is "**Sync**" at the '**Registrar Commands**' - this will trigger a manual sync of a domain's status and expiration date with Joker.com, in case it was modified outside of WHMCS.

This is usually also done automatically by the '**WHMCS domainsync cron**' - please make sure that you added this with your WHMCS installation.

Please send us your feedback: reseller-support@joker.com

Enjoy!

Version History

New in version 1.3.3

- added premium renewal price update in manual sync

New in version 1.3.2

- added support for language of IDN domains

New in version 1.3.1

- added support for .eu country of citizenship
- added use of WHMCS admin contact

New in version 1.3.0

Plugins & Interfaces

Simple WHMCS Plugin

[WHMCS](#) is a popular web hosting and automation solution, which includes billing and support options.

If you are using WHMCS for your hosting activities, you may interface Joker.com with WHMCS' domain functionality to easily order and manage domains from within WHMCS.

This is a very light weight and simple plugin, therefore very easy to install (you will find instructions in the readme of the zip archive below).

However, features are basic, and you have to configure a fixed set of contact handles for each TLD you want to use.

Any TLD of Joker.com should work.

This plugin is provided as an example to show, how easy it is to connect Joker.com to WHMCS using DMAPI. You may also use it as a starting point for your own experiments.

For a full integration of Joker.com into WHMCS, please use our official fully-featured Joker.com [WHMCS Registrar Module](#).

Plugins & Interfaces

Clientexec Registrar Plugin

Clientexec Registrar Plugin

[Clientexec](#) is a popular web hosting and automation solution, which includes billing and support

If you are using Clientexec for your hosting activities, you may interface Joker.com with Clientexec domain functionality to easily order and manage domains from within Clientexec.

Joker.com maintains a registrar module for Clientexec, which offers a great load of features to interface Joker.com seamlessly from within Clientexec:

The following registrar core functionality is provided:- domain availability check

- domain registration
- domain transfer
- domain renew
- domain transfers
- set autorenew
- set registrar lock
- set nameservers
- modify dns zone records (if joker nameservice is used)
- pricelist
- domain import

Plugins & Interfaces

Installation:

The installation is easy, **the plugin is already included with each copy of Clientexec**, just activate the "Joker.com plugin" from within Clientexec:

Settings => Plugins => Registrars: Select "Joker.com" from the list, and enter your Joker.com [API key](#).

Usage:

Create customers, and register domains with "**Packages => Order Domain Services**"...

Known Issues:

- IDN domains are currently not supported *)
- some ccTLDs may not supported by default
- Premium domains are currently not supported *)

*) this is a limitation of Clientexec

Plugins & Interfaces

Hostbill Joker.com Module

Hostbill Registrar Plugin

[Hostbill](#) is a popular web hosting and automation solution, which includes

- Hosting Automation
- Client Management
- Help Desk System
- Automated Billing
- Domain Management

If you are using Hostbill for your hosting activities, you can integrate Joker.com for the domain management within Hostbill using the Joker.com plugin.

At [Hostbill's Joker.com-plugin page](#) you find an overview of what is provided by our module:

- **Registration**
Automated domain registration. When enabled, domain module connects registrar API to register new domain name ordered by client.
- **Transfer**
Automated domain transfers. Customers can request domain transfer from other registrar to you. During signup customers are asked for EPP/transfer code used in transfer process.
- **Renew**
Automated domain renewals. Renew function gives the ability to renew the domain name by customer-purchased period when domain is about to expire
- **Synchronize**
Registry <-> HostBill synchronization. Domain synchronization allows your staff members to update HostBill domain records with registry details, ie. to make sure that domain renewal/expiration dates are in sync.
- **Import**
Automatically import existing domains from Registry -> HostBill.
- **Premium names**
Get premium domain price on registration page and register premium domain names

Plugins & Interfaces

- **Lookup engine**
Use registry API as lookup engine for fast & accurate domain searches
- **Manage contacts**
Update domain registration contacts. Customers can manage contact details related to domains they have registered with you.
- **DNSSEC Management**
Allow your customer to manage his domains DNSSEC keys at registry
- **Get EPP Code**
This functionality lets your clients get domain EPP Code, allowing to transfer domain out.
- **ID Protection**
This feature enables your customers to protect identity of their contact details stored.
- **Update Nameservers**
Customers have the ability to change nameservers the domain is pointing to.
- **Register Nameservers**
Clients can register their custom name servers using domain registrar API.

Installation:

The installation is easy, **the plugin is already included with Hostbill**, just activate the "Joker.com plugin" from within Hostbill:

SelectSettings -> Modules -> Domain Modules, choose Joker.com from the list and "activate".

Usage:

Please find an easy step-by-step documentation at [Hostbill's Joker.com plugin wiki](#).
