

1.8 Renewals

Simple Renewal

Simple Renewal

In case you have difficulties to renew a domain - e.g. because you have issues with your login account, or your designated administrator missed to renew it for you - **you are always able to renew a domain** for one year by using [Simple Renewal](#).

You not even need to be logged in, you just have to provide the domain name. You can also enter several domains one after the other and add them to the shopping cart, and finish with a single payment process at the end.

The domain will be extended for one year, no other data, permissions, claims or other aspects of this domain will be changed by this renewal.
