

# 1.8 Renewals

## Simple Renewal

### Simple Renewal

In case you have difficulties renewing a domain - e.g. because you have issues with logging in to your account, or your designated administrator missed renewing it for you - **you are always able to renew a domain** for one year by using [Simple Renewal](#).

You do not even need to be logged in, you just have to provide the domain name. You can also enter several domains one after another, add them to the shopping cart, and finish with a single payment process at the end.

**The domain will be extended for one year, no other data, permissions, claims or other aspects of this domain will be changed by this renewal.**
