

# 1.9 Nameservice

## How do I use name service (DNS) or URL forwarding at Joker.com?

### Joker.com Name Service

To add DNS records to your domain, or add **email- and URL forwarding**, please visit "[My Domains](#)", and choose "**DNS**" next to the respective domain. There, you will also find the [Dynamic DNS \(DynDNS\)](#) options, and the option to enable [DNSSEC Support](#).

In case the "DNS" function is not accessible, the reason for this is one of these:

- your domain does not use the free "**Joker.com Name Service**". This is required to use the Joker.com DNS editor. Please check the name service of your domain in '[My Domains](#)' -> '[Modify](#)'. You can change them there as well.
- your domain is in status "hold" - this means, it is currently not operational. Common reasons for this are "domain is expired", or "domain is under a dispute".

Switching to Joker.com Name Service is easy (and free): Visit "[My Domains](#)", and choose "**Modify**".

In the section "**Name servers**", click on the edit icon  , and choose 'switch to Joker.com name service'.

Please find some more details here: [How to create a name server\(-record\)?](#)

Unique solution ID: #1074
