1.9 Nameservice

How do I use name service (DNS) or URL forwarding at Joker.com?

Joker.com Name Service

To add DNS records to your domain, or add email- and URL forwarding, please visit "My Domains", and choose "DNS" next to the respective domain. There, you will also find the <u>Dynamic DNS (DynDNS)</u> options, and the option to enable <u>DNSSEC Support</u>.

In case the "DNS" function is not accessible, the reason for this is one of these:

- your domain does not use the free "Joker.com Name Service". This is required to use the Joker.com DNS editor. Please check the name service of your domain in 'My <u>Domains' -> 'Modify'</u>. You can change them there as well.
- your domain is in status "hold" this means, it is currently not operational. Common reasons for this are "domain is expired", or "domain is under a dispute".

Switching to Joker.com Name Service is easy (and free): Visit "My Domains", and choose "Modify".

In the section "Name servers", click on the edit icon , and choose 'switch to Joker.com name service'.

Please find some more details here: How to create a name server(-record)?
