# 1.9 Nameservice How to create a name server (-record)?

### **Create Name Servers and Records**

If you do not want to use the free Joker.com name service, instead, you want to use a **custom name server**, you first have to "register" it. For this, please

- 1. visit "My Domains", choose the domain to add a nameserver to
- 2. click on 'Modify', and then the edit icon 🗹

in the section "Nameservers"

3. click on "register NS"

#### To add non-Joker.com name servers to a domain, please

- 1. visit "<u>My Domains</u>", choose the domain to add a nameserver to
- 2. click on 'Modify', and then the edit icon in the section "Nameservers"
- 3. click on "Use custom nameservers"

To add IP addresses, URL- or EMail-forwardings or other DNS records to your non-Joker.com external name servers, please

• check which tools the provider of your external name server does provide

#### To add IP addresses or other DNS records to Joker.com name servers, please

- visit "<u>My Domains</u>"
- click on "DNS" next to the relevant domain
- find more about types of DNS records at Joker.com and how to configure name servers

**Please note:** Creating name servers (e.g. registering a hostname with an IP address to define a name server) does only work with Joker.com, if the domain used for these name servers also is

## **1.9 Nameservice**

a Joker.com domain.

#### This is a technical/registry-based limitation.

If a domain from another registrar should be used, only this other registrar is able to register the name servers with the registry.

Of course, just using external, **already existing** nameservers with any Joker.com domain is fine.
