

Domains

domain-renew

Requires (mandatory)

<i>domain</i>	domain name to renew
<i>period</i>	renewal period in months (not in years!)
<i>expyear</i>	the wanted expiration year (e.g. '2014')

Accepts (optional)

privacy

basic|pro|none|keep - adds whois privacy domain renewal
none: explicitly do a renew without privacy currently privacy is enabled

keep: renew with the same level of privacy currently active for the domain

see also [Whois Privacy Services](#)

max-price

	maximum to pay for registration transfer. If a number above 0. If not provided has non-s <i>max-price</i> domain price registration fail. If <i>max-price</i> actual domain price the actual price deducted
--	---

With this request you can renew the domain. Please be aware that all renewals are not refundable.

Domains

"**expyear**" is a safety option which can be used **instead of "period"** to renew domain till specified year (not longer). If you use "period", and by mistake send the request more than once, domain will be renewed again, while with "expyear", it will not be renewed if it's expiration year is greater or equals to specified.

Only one of "period" or "expyear" may be used, but not both.

Please note:

- registration period is in **months, not years!** In most cases, this number is a **multiple of 12**.
- to prevent from unintended/erroneous multiple renewals, **a specific domain name can only be renewed once per 6 hours**. This means, if you want to renew a domain for 2 years, you should use a period of "24" - in case you want to renew using two requests with a period of "12", the 2nd request must not be sent before 6 hours after the 1st one.

Example:

```
https://dmapi.joker.com/request/domain-renew?domain=example.com&period=12&auth-sid=<your-current-session-id
```
