

Domains

domain-delete

Requires (mandatory)

<i>domain</i>	domain name to delete
---------------	-----------------------

Accepts (optional)

<i>force</i>	if present and set to '1', 'Y' or 'Yes', the domain will be deleted even if older than 72 hours.
--------------	--

With this request you can delete a domain.

If you delete a domain (**gTLDs only**) within the **first 72 hours** after the registration, **the registration-fee will be refunded** to your account.

To delete a domain which is registered for more than 72 hours, you must specify "force=1", otherwise the request will be rejected.

Please note: The number of refundable deletions of domains per month is limited, and depends on the number of domains in a portfolio, and the related TLD registry.

Example:

```
https://dmapi.joker.com/request/domain-  
delete?domain=example.com&force=1&auth-sid=<your-current-session-id>
```
