Contacts contact-create

Requires:

target TLD where this contact is intended to
be used.
full name (if empty, fname + Iname will be used)
first name (required for .FI contacts)
last name (required for .FI contacts)
(optional)
(optional) Y, Yes, N, No
(optional if individual)
mailaddress of the contact
street address
(optional)
(optional)
ISO country code (2 letters)
(optional)
language to use for .EU contacts
required for .US contacts
required for .US contacts
required for .US contacts
required for .UK contacts, if used as
owner contact
required for .UK contacts with
specific account types
required for .SE/.NU contacts
(optional) for .SE/.NU contacts
required for .FI contacts
(yes/no) required for .FI contacts
required for .FI contacts, if ficora-
type is company
required for .FI contacts, if type is
person and finnish
required for .FI contacts, if type is persion and not finnish

Either "name" or "Iname" and "fname" must be provided.

Contacts

Fields **not** marked '(optional)' are mandatory (and must not be empty).

Parameters "Iname" and "fname", if provided, will be converted to "name" (simple concatenation of "fname" and "Iname"), because registries support only "name" format. In general, use of "fname" and "Iname" is deprecated, and support for these fields will be removed in version 1.2.

"**orgid**" represents Swedish personal or organisational number and is required for .SE/.NU contacts.

It starts with ISO 3166 Alpha-2 country code in square brackets. If the country code for Sweden is given [SE] a valid Swedish personal or organisational number must be given (6 digits, dash, 4 digits), otherwise 1 to 123 characters can follow.

If organization is empty and the country code for Sweden [SE] is given, orgid must be a personal number, not an organisational number.

"vatid" is optional for .SE/.NU contacts. It starts with a two letter country code (uppercase), followed by an optional space, followed by a country specific string containing digits 0-9, and letters a-z and A-Z, maximum 64 Chars.

For .fi contacts:

"x-ficora-type" is required for .fi contacts. The following values are accepted: privateperson, company, corporation, institution, political party, township, government, publiccommunity

"x-ficora-registernumber" is required if x-ficora-type is set to "company".

"x-ficora-is-finnish" is always required for .fi contacts: yes = finnish company or person, no = not a finnish person or company

"x-ficora-identity" is required for .fi contacts, if x-ficora-type is set to 'privateperson' and x-ficora-is-finnish is set to 'yes'

Contacts

"x-ficora-birthdate" is required for .fi contacts, if x-ficora-type is set to 'privateperson' and x-ficora-is-finnish is set to 'no' in the following date format "YYYY-MM-DD".

Please note:

- Parameters listed here (except "tld") may be used (or are required) in other requests, this is indicated by referring to "Contact fields".
- "lang" must contain two-letter ISO country (language) code, and is only required when creating .EU contacts. The purpose is to specify language to be used in notifications emails, sent from EURid. Please note - this field cannot be modified later, and the default is 'EN' (English)!
- "app-purpose", "nexus-category" and "nexus-category-contry" are required only when creating .US contacts, and cannot be modified later.
