How to enable Whois Privacy?

How to enable Whois Privacy Services

Whois Privacy Services are available for **most generic top-level domains**. The availability is always indicated in Joker.com's [price list](#) and also the [domain search](#).

Privacy Services are available for new domain registrations, transfers, and renewals - and they can also be applied to existing domains.

Please find all details about the services, pricing, and periods here at [Whois Privacy Services](#).

Enabling Privacy Services for existing Domains

To order Privacy Services for your existing domains, please either

- click on the **icon** for "*modify your domain settings*" on the **home page**, right to your domain
- enter the domain name into the field below '**Shortcut to your domains**', click '*Modify Domain*'
- enter the **Service zone**, chose '*Domain Settings*,' click on your domain
- or go directly to '*Domain Settings*' [using this Link](#)

You will then find the **Privacy** status and options to add within '**Domain Information**':

Transfer a Domain and add Privacy Services

We now also offer to apply Privacy Services to domains **during a transfer**. This is implemented in such a way, that in case a domain that already used privacy services with the former, losing registrar, the Whois data will **not be disclosed at any time**. To choose privacy options, please start a transfer as usual, and find your choice in section '**Additional Products**' below the AUTH-ID:

Transfer to Joker.com

To transfer a domain to Joker.com, you have to provide a so called *AUTH-ID* (also called *Domain Password*, *AUTH-INFO*, *EPP-Code* or *AUTH-CODE*).

This ID is the proof of authorisation regarding to this domain.

You have to request this ID from your *current Registrar* or *provider*!

In case it is not possible to determine the AUTH-ID for your domain, you may try to enter "none" here. **This will result into a manual investigation.** Please note that this will most probably **delay the transfer process**, and the transfer will not be performed automatically.

For **.eu Domains**, the AUTH-ID can also be requested directly from [the registry](#).

Without a valid AUTH-ID, a transfer will not succeed.
