# 1.3 Domain Registration How to enable Whois Privacy?

### How to enable Whois Privacy Services

Whois Privacy Services are available for **most generic top-level domains**. The availability is always indicated in Joker.com's <u>price list</u> and also the <u>domain search</u>.

Privacy Services are available for new domain registrations, transfers, and renewals - and they can also be applied to existing domains.

Please find all details about the services, pricing, and periods here at <u>Whois Privacy Services</u>.

#### **Enabling Privacy Services for existing Domains**

To order Privacy Services for your existing domains, please either

- click on the icon for "modify your domain settings" on the home page, right to your domain
- enter the domain name into the field below 'Shortcut to your domains', click 'Modify Domain'
- enter the Service zone, chose 'Domain Settings,' click on your domain
- or go directly to 'Domain Settings' using this Link

You will then find the **Privacy** status and options to add within 'Domain Information':

### **Transfer a Domain and add Privacy Services**

We now also offer to apply Privacy Services to domains **during a transfer**. This is implemented in such a way, that in case a domain that already used privacy services with the former, losing registrar, the Whois data will **not be disclosed at any time**. To choose privacy options, please start a transfer as usual, and find your choice in section '**Additional Products**' below the AUTH-ID:

#### Transfer to Joker.com

To transfer a domain to Joker.com, you have to provide a so called AUTH-ID (also called Domain Password, AUTH-INFO, EPP-Code or AUTH-CODE).

This ID is the proof of authorisation regarding to this domain. You have to request this ID from your *current* Registrar or provider!

In case it is not possible to determine the AUTH-ID for your domain, you may try to enter "none" here. This will result into a manual investigation. Please note that this will most probably delay the transfer process, and the transfer will not be performed automatically.

For .eu Domains, the AUTH-ID can also be requested directly from the registry.

Without a valid AUTH-ID, a transfer will not succeed.
