

1.3 Domain Registration

I have made a typo. How can I cancel my domain name registration?

Cancel a domain name registration

We are sorry but this is not possible. **Domains are registered in real-time**. So please check your domain name **carefully** to avoid any further problems.

In case you made a typo you will have to start again.

Of course, it is always possible to delete a domain name - but this will not result in a refund. ¹⁾

1) Resellers receive a refund for deletions of **gTLDs** within 72h after registration
