

Domains

List domains

Introduction

List domains

With this request you can get a list (lexicographically sorted) of all the domains you have currently registered at joker.com. You have to provide the target registry within the request:

GET /?com=nl

GET /?com=nl

GET /?com=nl

GET /?com=nl

GET /?com=nl

GET /?com=nl

GET /?com=nl

GET /?com=nl

GET /?com=nl

GET /?com=nl

GET /?com=nl

GET /?com=nl

Limitations

- Only 20.000 domains are listed. If you have more than 20.000 domains under 1 registry at joker.com, you have to track the domain names yourself.
- In case you have more than 20.000 domains at joker.com under 1 registry, this request will not work for you. The listing would be incomplete and it will be missing random domains.
- This request works only with the new joker.com system.

Request fields

mailsubject: list domains [your reference id]

Definition of the request

Request field	List domains	Response
mailsubject: list domains [your reference id]	com=nl	nl

List domains

Example 1: list domains for .com-domains
