## Rights and Roles grants-invite

## **Request parameters:**

name	value	mandatory
domain	Full qualified domain name	yes
email	Email of user to be invited to accept a role for 'domain'	yes
role	Role offered (@admin/@billing/@tech/@creator)	yes
client-uid	receiving Joker.com user id as shown on Joker.com - also conforms to reseller-id	no
nick-name	Name or comment for this role/grant for later identification (defaults to email)	no

With this request you can assign <u>'Roles' (permissions)</u> of domains to other Joker.com users. The special role "creator" is an equivalent to an **internal transfer** of that domain to another Joker.com user. In this case, the domain is **assigned** to the receiving account's portfolio, including all rights and permissions on this domain.

There are two variants to use this functionality: If the **client-uid** (Joker.com user account id) is given, and the client-uid matches the associated user's email address in our system, the role is applied immediately - there will be no request for confirmation on the receiver's side. In case the client-uid is not given, but only the email address, the transaction has to be acknowledged by the receiving user. For this, he will get an email ('invitation'), containing a link and a key. Either the link has to be clicked, or the key has to be applied using Joker.com (=> Transfer). This can also be used for users which do not yet have a Joker.com account.

Please see more details: How to grant roles (= grant permissions to others)?.

Returns status only (ok or not). Email is sent if request was succesfull.
