## WHMCS Registrar Module

### WHMCS Registrar Module

[WHMCS](#) is a popular web hosting and automation solution, which includes billing and support

options.

If you are using WHMCS for your hosting activities, you may interface Joker.com with WHMCS' domain functionality to easily order and manage domains from within WHMCS. <sup>1)</sup>

Joker.com maintains a registrar module for WHMCS, which offers a great load of features to interface Joker.com seamlessly from within WHMCS:

The following registrar core functionality is provided:

- register domains
- initiate transfers
- perform renewals

A screenshot of the WHMCS Registrar Module interface. The top navigation bar includes 'Home', 'Services', 'Domains', 'Billing', 'Support', and 'Open Ticket'. The user is logged in as 'Hello, Jan!'. The main content area is titled 'Managing gnrz24.com' and shows a list of 'Addons' available for the domain. The addons listed are 'ID Protection' (Buy Now for \$0.00 USD), 'DNS Host Record Management' (Manage/Disable), and 'Email Forwarding' (Manage/Disable). The interface is powered by WHMCompleteSolution.

- allow viewing and changing of nameservers

# Plugins & Interfaces

- allow viewing and changing of WHOIS information of domains
- usable with any TLD Joker.com offers
- TLD & Pricing Sync

Additionally, also these features are provided:

- create/edit email forwards
- create/edit dns records for joker-ns
- fetch auth id ("EPP Code")
- sync of expiration date
- order whois privacy protection with domain registration, transfer and renewal
- switch easily between production and testing environment (OT&E)

## Installation:

Please extract the contents of the **below attached ZIP archive** into the folder

***modules/registrars/joker/***

of your **WHMCS** installation.

The configuration of the Joker.com registrar module is done by using the **WHMCS admin section**. For this, please login as "admin" into your WHMCS installation, and navigate to

### **Setup -> Products/Services -> Domain Registrars**

Pick "Joker.com" from the list, "Activate" the plugin, and enter your Joker.com Reseller's credentials - **the same you are using for DMAPI**.

Alternatively, you also may use Joker.com [API keys](#).

You also may choose to use the "TestMode" for dry run on our OT&E platform, or to configure the free Joker.com nameservers as a default for new domains.

Once activated, you may always change these settings by clicking on "Configure". Don't forget to "Save Changes" after doing so.

## Usage:

# Plugins & Interfaces

You will find most options for domains in section "**Clients -> Domain registrations**" - **click on the domain name** to see all domain details.

A special command there is "**Sync**" at the '**Registrar Commands**' - this will trigger a manual sync of a domain's status and expiration date with Joker.com, in case it was modified outside of WHMCS.

This is usually also done automatically by the '**WHMCS domainsync cron**' - please make sure that you added this with your WHMCS installation.

Please send us your feedback: [reseller-support@joker.com](mailto:reseller-support@joker.com)

Enjoy!

<sup>1)</sup> the WHMCS plugin is provided "as-is" without any further obligation or promise of quality or reliability. The normal Joker.com Terms & Conditions apply. WHMCS Limited is responsible for the functionality and availability of the WHMCS system.

## Version History
